

AROMA®

Digital Induction Cooktop

The fastest, safest way to cook: induction
Up to 70% more efficient than traditional stoves
Cooks at a high heat with no open flame
Incredibly even heating with 7 heat settings
Programmable 180-minute timer with automatic shut-off

Digital Induction Cooktop

Take advantage of the fastest, safest way to cook with the Aroma Induction Cooktop. Induction heats quicker than traditional gas or electric stovetops and operates up to 70% more efficiently! The Aroma Induction Cooktop will only operate when induction-safe cookware is in place and shuts off automatically once cookware is removed. The easy-to-use digital controls feature 7 heat settings (1 to 6 cooking heat levels along with a "Warm" setting) and the programmable timer sets up to 180 minutes. Induction cooks without flames, heating the cookware itself instead. And since the cooktop does not heat, burnt on spills are a thing of the past! Potential messes easily wipe away from the ceramic cooktop surface. The induction cooktop is also great for serving on its "Warm" setting.
